

DOWNSLANT SHELVES

DOWNSLANT SHELVES

The Downslant Shelf provides the best presentation of many items by displaying them "face out". This shelf is greatly effective at low heights, as the shelf is directly in the customer's view. Maximum product facings combined with shallow depth gives a fully stocked appearance with minimum inventories. Comes full assembled with two-position brackets, 45° or 62°. The 45° position will hold up to 150 lbs. The shelf has a 4" return lip and comes with 1.25" tag molding.

Item#	MDS		Length	Height
Prefix	Length		Back Height	
MDS	24"		10"	
	36"		12"	
	48"		14"	
			16"	
			18"
